BESPOKE
DAMP & MOULD TRAINING

Who We Are

The Federation of Damp delivers specialist damp, mould, and moisture training to organisations responsible for managing, maintaining, and surveying residential and commercial property portfolios.

We work with housing associations, local authorities, councils, contractors, and commercial organisations, helping teams improve damp diagnosis, reduce repeat issues, and raise professional standards across their workforce. We have delivered training to organisations including Manchester local government, Thanet District Council, and other public and private sector clients.

Why Bespoke Training?

Damp and mould issues are complex, costly, and often misdiagnosed. Generic training does not address the realities faced by housing providers and asset managers.

Our bespoke training programmes are designed to:

- Improve damp and mould diagnosis accuracy
- Reduce repeat repairs and complaints
- Increase staff competence and confidence
- Standardise knowledge across teams
- Support compliance and professional development

Every programme is tailored to your organisation, property stock, and operational challenges.

Who Our Training Is For

Our bespoke training is ideal for:

- Housing associations
- Local authorities and councils
- Social landlords
- Property and asset management teams
- Maintenance and repairs teams
- Damp and mould investigation teams
- Environmental health and compliance teams

Training is suitable for technical staff, surveyors, housing officers, and maintenance teams.

What We Offer

We provide fully bespoke training programmes, including:

Damp & Moisture Diagnosis

- Rising damp, penetrating damp and condensation
- Moisture movement and building pathology
- Correct investigation methods
- Avoiding misdiagnosis

Mould Assessment & Management

- Causes of mould growth
- Health considerations
- Ventilation and condensation control
- Remediation best practice

Damp Proofing & Remedial Works

- Damp proof course systems
- Site preparation and installation
- Waterproof rendering systems
- Membranes and tanking

Surveying & Reporting

- Damp surveys and inspections
- Evidence-based reporting
- Professional recommendations
- Communication with residents and stakeholders

Bespoke Programme Design

All training programmes can be tailored to include:

- Course length (half-day, one-day, or multi-day)
- On-site delivery at your offices or properties
- Online or blended learning options
- Property-specific case studies
- Role-specific content (surveyors, operatives, housing officers)

On-Site Training Nationwide

Our trainers can travel to your offices or sites anywhere in the UK, delivering practical and classroom-based training directly to your teams. This minimises disruption, reduces travel costs for your staff, and allows training to be delivered in a relevant, real-world context.

Training Materials & Assessment

All courses include:

- Detailed printed workbooks for every attendee
- Structured course content aligned to best practice
- A final assessment or examination
- Certification for successful delegates

Workbooks are designed to be retained as long-term reference materials.

CERTIFICATION & PROFESSIONAL RECOGNITION

Successful attendees receive Federation of Damp certification, demonstrating:

- Verified training completion
- Professional competence
- Commitment to best practice

Certification supports staff development, compliance, and professional credibility

WHY CHOOSE FEDERATION OF DAMP?

- Specialist damp and mould expertise
- Industry-led training
- Experience working with public sector organisations
- Practical, evidence-based approach
- Trusted by councils, housing providers and contractors

We focus on practical outcomes, not just theory.

How It Works

1. **Initial consultation – understand your organisation's needs**
2. **Programme design – tailor content and delivery**
3. **Training delivery – on-site or online**
4. **Assessment & certification – for all attendees**

Next Steps

If your organisation is interested in bespoke damp and mould training, we would be happy to discuss your requirements and design a programme to suit your teams.
